

January 31, 2023

ProPricer™ Customers,

ProPricer version 9.5.100.2 fixes issues in version 9.5.100.0 that was recently released. If you already installed 9.5.100.0, please read the important note about upgrading to 9.5.100.2 on the following page.

If you have any questions or issues, please contact our Technical Support team at (951) 693-0440 or support@propricer.com.

I am also available to discuss any general feedback you have about ProPricer. Enhancements suggested by our customers help us to serve you better as a software provider.

Thank you for your continued support of the ProPricer line of products,

Nik Slepushkin

Product Management Director

Executive Business Services, Inc.

ProPricer Version 9.5.100.2

To find your current version: open ProPricer and go to **Help > About**.

For a tour of the latest version of ProPricer, check out the “What’s New in ProPricer” webinar available on the [ProPricer Support Portal](#).

To view the latest plans for upcoming releases and lessons on getting started in ProPricer, go to the [ProPricer Bulletin](#).

Release Date: January 31, 2023

Version: 9.5.100.2

Release: R1

Current database version: 161

Model version: 9.5.0.0

Current package/Stored procedure version: 161

Contains database upgrade: No

Contains server upgrade: Yes

Important notes:

Upgrading from ProPricer 9.5.100.0 to 9.5.100.2

Back up your server configuration files before upgrading from 9.5.100.0 to 9.5.100.2

Warning: If you already installed ProPricer 9.5.100.0, back up the following server configuration files, or else they will be overwritten:

- ProPricerServer.config.json
- ProPricerServerManager.config.json
- EBS.ProPricer.Client.config.json

Upgrading from ProPricer 9.4 or earlier to 9.5.100.2

Before upgrading, an SSL certificate must be installed on your server to ensure secure, encrypted communication. This was not a system requirement in previous versions of ProPricer, but it is required beginning with version 9.5.100.0.

There is no need to deactivate ProPricer 9.2, 9.3, or 9.4 prior to installing ProPricer 9.5.100.2. During the installation and after opening 9.5.100.2 for the first time, the user will be prompted to migrate their license to 9.5.100.2.

Any customers directly upgrading from ProPricer 9.0 to ProPricer 9.5.100.2 will need to perform a few additional steps. Since 9.5.100.2 installs in a new directory, those who have already installed and used 9.0 will need to deactivate their copies of 9.0 (**Help > About > Deactivate**) before upgrading. To complete this process, uninstall the 9.0 client and server applications, install the new 9.5.100.2 server and client, then register the new version. These extra steps are a necessary part of the upgrade process.

Your license keys reflect the use of ProPricer as a product, rather than any specific version. For example, if you have ten available ProPricer seats via your license agreement and you have two versions activated on the same machine, you are essentially using two of your ten available seats. By deactivating 9.0 prior to installing 9.5.100.2, you regain an available seat of ProPricer and make it available for other users within your organization.

If you are upgrading from a version of ProPricer that is older than 9.3.103 and you have a Concurrent license, contact Technical Support to get a new license key for the latest version. If you have a Single Workstation license, then no action is required.

Support ending for ProPricer 9.3

Support is ending soon for ProPricer 9.3. Starting with the next 9.5 release (R2) planned for June 2023, support will end for all versions up to 9.3.106. At the end of 2023, support will end for all remaining 9.3 versions with another 9.5 release (R3). We encourage all ProPricer customers to upgrade to the latest version, especially those using 9.3. Customers who are using 9.3 but are in the process of upgrading will still have access to 9.3 support.

ProPricer companion products

If you plan to upgrade a ProPricer companion product that is version 3.3.108 or older, it must be uninstalled before installing the latest version. You will experience issues upgrading Connect for Excel, Connect for Word, GSA Travel Import, and Management Console when version 3.3.108 or older is still installed on your computer.

Fixes

Auto Shutdown time limit

The Auto Shutdown (Minutes) value entered in the System Options no longer incorrectly converts to milliseconds.

Import/Export Tool

- When importing data, the Replace Existing Sheets option now works correctly.
- When exporting data, checkboxes are only shown for the existing sheets.
- An error no longer occurs when importing cost source data, overrides, and CERs.
- When importing data, the base date format is now correct.
- When creating a template, after a proposal is selected, the correct checkboxes are shown.
- Improved backwards compatibility for files that were created and used with previous versions of the Import/Export Tool.
- An error with the processing of spreadsheet document properties has been fixed.

Known issues

- The 9.5.100.2 installation process overwrites server configuration files. Customers who already installed 9.5.100.0 must back up their configuration files before upgrading to 9.5.100.2.
- After a five-minute period of inactivity in ProPricer, a user interface deadlock may occur.

Upcoming features

The features that will be included in upcoming releases may change. To view the latest plans for upcoming releases, go to the [ProPricer Bulletin](#).

ProPricer v9.5 R2

Anticipated 2nd quarter of 2023

- Multiple Material-related enhancements
- Unit of Measure Conversion Table
- Multiple customer-driven enhancements

ProPricer v9.5 R3

Anticipated 4th quarter 2023
