

February 23, 2023

ProPricer™ Customers,

ProPricer version 9.5.100.5 fixes issues in the Import/Export Tool included in ProPricer version 9.5.100.3.

If you have any questions or issues, please contact our Technical Support team at (951) 693–0440 or [support@propricer.com](mailto:support@propricer.com).

I am also available to discuss any general feedback you have about ProPricer. Enhancements suggested by our customers help us to serve you better as a software provider.

Thank you for your continued support of the ProPricer line of products,

**Nik Slepushkin**

Product Management Director

Executive Business Services, Inc.

Version: 9.5.100.5

Release: R1

Current database version: 161

Model version: 9.5.0.0

Current package/Stored procedure version: 161

Contains database upgrade: No

Contains server upgrade: No

---

## Important notes:

### Upgrading from ProPricer 9.4 or earlier to 9.5.100.5

Before upgrading, an SSL certificate must be installed on your server to ensure secure, encrypted communication. This was not a system requirement in previous versions of ProPricer, but it is required beginning with version 9.5.100.0.

There is no need to deactivate ProPricer 9.2, 9.3, or 9.4 prior to installing ProPricer 9.5.100.5. During the installation and after opening 9.5.100.5 for the first time, the user will be prompted to migrate their license to 9.5.100.5.

Any customers directly upgrading from ProPricer 9.0 to ProPricer 9.5.100.5 will need to perform a few additional steps. Since 9.5.100.5 installs in a new directory, those who have already installed and used 9.0 will need to deactivate their copies of 9.0 (**Help > About > Deactivate**) before upgrading. To complete this process, uninstall the 9.0 client and server applications, install the new 9.5.100.5 server and client, then register the new version. These extra steps are a necessary part of the upgrade process.

Your license keys reflect the use of ProPricer as a product, rather than any specific version. For example, if you have ten available ProPricer seats via your license agreement and you have two versions activated

on the same machine, you are essentially using two of your ten available seats. By deactivating 9.0 prior to installing 9.5.100.5, you regain an available seat of ProPricer and make it available for other users within your organization.

If you are upgrading from a version of ProPricer that is older than 9.3.103 and you have a Concurrent license, contact Technical Support to get a new license key for the latest version. If you have a Single Workstation license, then no action is required.

### **Support ending for ProPricer 9.3**

Support is ending soon for ProPricer 9.3. Starting with the next 9.5 release (R2) planned for June 2023, support will end for all versions up to 9.3.106. At the end of 2023, support will end for all remaining 9.3 versions with another 9.5 release (R3). We encourage all ProPricer customers to upgrade to the latest version, especially those using 9.3. Customers who are using 9.3 but are in the process of upgrading will still have access to 9.3 support.

### **ProPricer companion products**

If you plan to upgrade a ProPricer companion product that is version 3.3.108 or older, it must be uninstalled before installing the latest version. You will experience issues upgrading Connect for Excel, Connect for Word, GSA Travel Import, and Management Console when version 3.3.108 or older is still installed on your computer.

## Import/Export Tool fixes

- Sheets with date columns can now be imported successfully.
- Travel data can now be imported successfully.
- An issue that allowed an import or export of proposal material data to process without a selected proposal has been fixed.
- The ProPricer Import/Export Tool desktop icon has been updated.
